Institutions

The Management of the Water Resources of the Cyprus is carried out mainly by two Ministries, the Ministry of Agriculture, Natural Resources and Environment which through the [Department of Water Development](#) is responsible for all technical and administrative aspects of water resources development, protection and management and the [Ministry of Interior](#) which is mainly responsible for the administration at the consumers level.

Other institutions are responsible for wastewater collection treatment and other activities, which make the task of water management more complicated.

At present there are plans by the Government to reorganize the institutional set-ups of the water sector through the establishment of a water entity to undertake responsibility for the management of all water resources responsible for all the water cycle.

TURKISH

A number of governmental and non-governmental organisations have direct and indirect interest in the development and conservation of water resources in Turkey. Institutional framework has three levels; namely, decision making, executive and users level. In decision making level, prime ministry, state planning organisation and ministries take place. Governmental organisations under the ministries are at the executive level.

There are both governmental and non-governmental organisations at the water users level for the operation and maintenance of the projects. The four main organisations responsible for development of water resources are General Directorate of State Hydraulic Works (DSI), General Directorate of Rural Services (GDRS), General Directorate of Bank of Provinces (Iller Bank), and General Directorate of Electric Power Resources Survey and Development Administration (EIE).

The screenshot shows a website interface with a light blue background. At the top left, the logo for SEMIDE EMWIS is displayed, with 'SEMIDE' in a larger font above 'EMWIS'. To the right of the logo, the text 'French Focal Point' is written in a dark blue font. In the top right corner, there is a small logo for SNIDE and another logo for the French Republic. The main heading 'Documentation' is centered in a large, dark blue font. Below the heading is a horizontal navigation bar with eight blue buttons: 'Home', 'News', 'Links', 'Institutions', 'Documentation' (which is highlighted with a darker blue background), 'Training', 'Laws', and 'Data manag.'. Below the navigation bar, there are two bullet points, each preceded by a blue oval icon. The first bullet point is a link to 'EMWIS Topics French Contribution'. The second bullet point describes access to scientific, technical, economical, juridical, and R&D databases, and to Fontaine, the French Water Agencies database. At the bottom of the page, there is a thin blue horizontal line and a footer containing links for 'Home', 'Français', 'Contact us', 'Copyright', and 'Disclaimer'.

Training

With the Countries' social and economic development, the problems related to water resources and the environment are increasing. The water sector and, more generally, the one related to the natural resources safeguard, require a continuous updating for everyone involved. In Italy there are several firms and institutes dedicated to training. These entities can be divided into two categories:
