EURO-MEDITERRANEAN PARTNERSHIP

Context of EMWIS activities

1995 Euromed Partnership

1996 Euromed Ministers
Initiate EMWIS

1999 EMWIS operational launch

2005 EMWIS first activities on data
management

2008 UfM Water Ministerial conference
Long Term Water Strategy
initiated

Focus on know-how sharing

- 9 years of operation
- 20 countries
- About 50 000 visitors per month

➤ Confidence between water authorities

• Feasibility studies of National Water

Information Systems (Algeria, Cyprus, Israel, Jordan, Lebanon, Malta, Morocco, Palestine, Tunisia, Turkey)

• Preliminary analysis for a Mediterranean Water Observation Mechanism - 2006-2007

(7 national diagnostic studies, 25 international initiatives consulted)

Mission framework

- **Regional project supported European Commission**
 - **Towards a Mediterranean Water Information System compatible with Water information for Europe**
- **Main activities**
 - **Metadata catalogue (data discovery)**
 - **Interoperability guidelines**
 - Standards
 - Data models
 - **Map viewer and administrative reference data sets for the region**
 - **Thematic activities (working groups)**
 - Water quality monitoring networks and programmes
 - Water scarcity and drought
 - **Data harmonisation pilot**
 - Tunisia and Jordan
 - Based on UNDS water accounting approach (SEEAW)
 - **Multilingual thesaurus enhancement**
 - **National technical workshops:**
 - State of plays on National Water Information systems
 - Tunisia, Lebanon, Jordan, Egypt, Palestine, Morocco, Turkey, Syria

- **UfM Mediterranean Water Strategy**
 - ❑ Strengthening the provision of data, information and statistics on water
- **Arab Countries water strategy**
 - ❑ Database on shared water resources
- **EU - Horizon 2020 – Depolution of Mediterranean sea**
 - ❑ Monitoring: Urban waste water, Industrial emission and Urban solid waste
 - ❑ Extension of Shared Environmental Information System
- **UNEP - Mediterranean Strategy for Sustainable Development**
 - ❑ Resources and Demand indicators
- **UN – Water => World Water Assessment Programme**
 - ❑ Total freshwater renewable resources
 - ❑ MDG goals
 - ❑ Water abstraction per sector

Union for the Mediterranean: High level of expectations

- **Civil Society:**
 - *“underline the need for reliable data and to enable the free flow of information and sharing of data”*
- **Ministerial declaration:**
 - *“reaffirm the importance of data, information and statistics on water, based on internationally agreed definitions and methods, structured within information system ”*
 - *“call for strengthening the coordination of existing Euro-Mediterranean initiatives and networks on information and expertise, policy planning and monitoring ”*
 - *“underline the importance of exchange of good practices, including through EU, Mediterranean, and other relevant programme ”*

Ministerial conference on Water, Dead Sea, Dec'2008

Strengthening Water Information and monitoring in the Mediterranean

- **Improving National water data systems in coherence with international standards**

- **Coordinating data collection mechanisms**

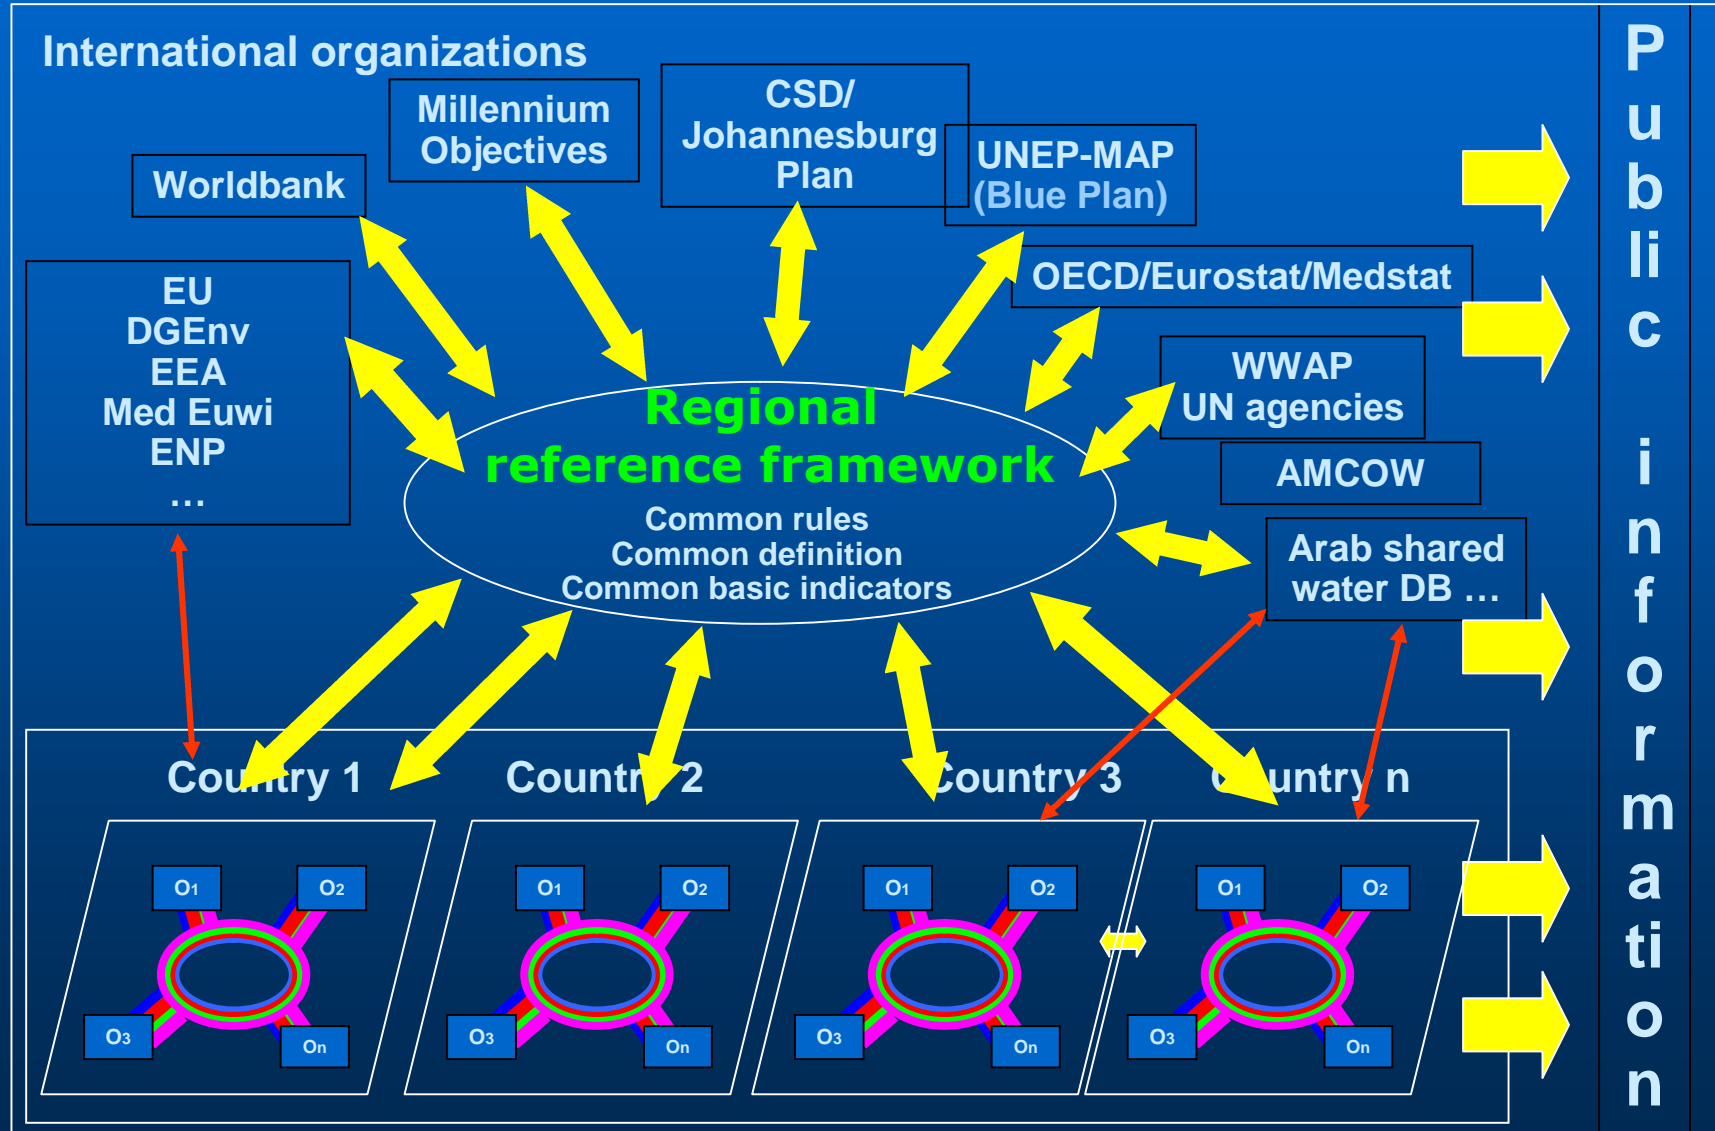

- Harmonisation of definitions (interoperability)
- Mutualisation of resources
- Fostering NWIS as main source of reliable data
- Exchange of experiences

- ❑ Preparation of Med water knowledge hub (concept note)

- ❑ Capacity building programme on Earth observation for water management

Overall Mediterranean vision

Shared Water information Systems

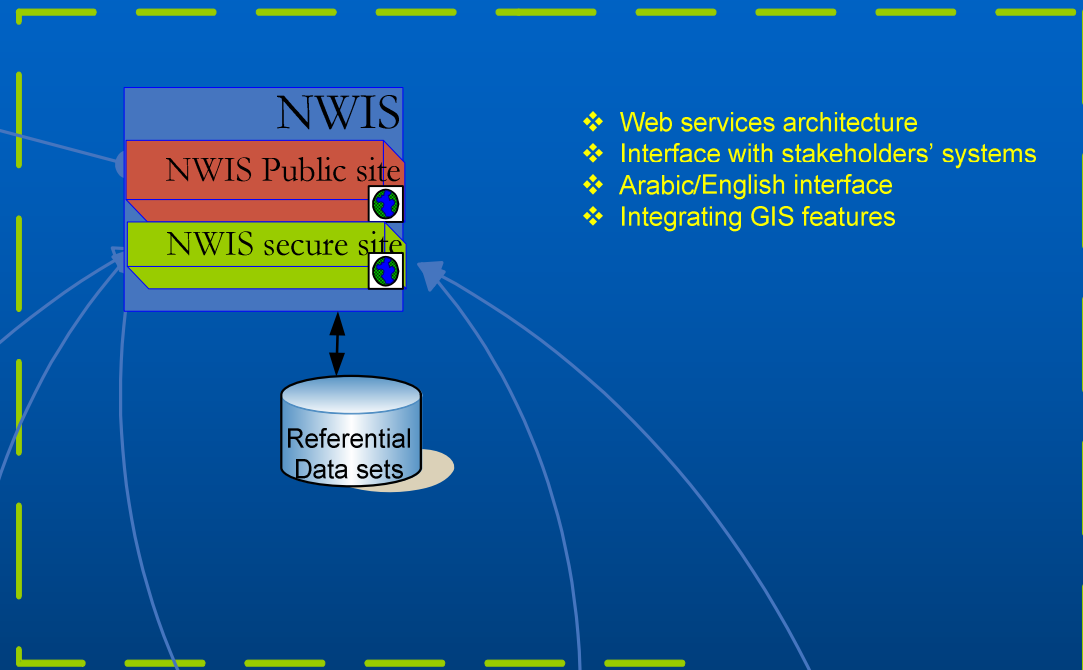

NWIS Management

Data access right defined by data owners

Data exchanges can be restricted to a close group of stakeholders

Web navigator

Stakeholders

Constraints

- Lack of legal framework for reporting water data
- Many international initiatives and political processes
- “Observation”/“monitoring” seen as intrusive for national water management

Opportunities

- Strong demand of international stakeholders
- Commitment to NWIS, but not yet developed
(information necessary for daily management)
- Common basic data used for the calculations of indicators
- Organisational problems rather than lack of data
- Union for the Mediterranean
(Mediterranean Water Strategy)

Content of a reference data framework

- **Referential datasets**
 - Hydrological networks (e.g. rivers, watersheds, lake, aquifers)
 - Water management areas (e.g. protected areas, administrative units)
 -
- **Data dictionaries (data models, reference lists)**
 - => Generic conceptual data model developed
- **Definition of indicators, data collection methods**
 - => Pilot activity on going on water quantities
- **Geo-catalogue of data sources and data services**
 - ⇒ Inventory activities
 - ⇒ Prototype available with a Mediterranean profile Linked map viewer
- **Interoperability specifications (exchange formats/ service protocols)**
 - => Recommendations on standards to be used (for SEIS/WISE/INSPIRE/ISO interoperability)

NWIS basic principles

- **Information should be managed as close as possible to its source**
 - Multiple partners/providers
- **Information collected once and shared with others for many purposes**
 - Different aims / user categories
 - Interoperability, geographical scales
- **Provision to the public of aggregated data**
- **Unique provider for each data type**
- **Gouvernance**
 - Strategic -> needs
 - Technical -> referential data sets
 - Basins (or management units) -> data collection

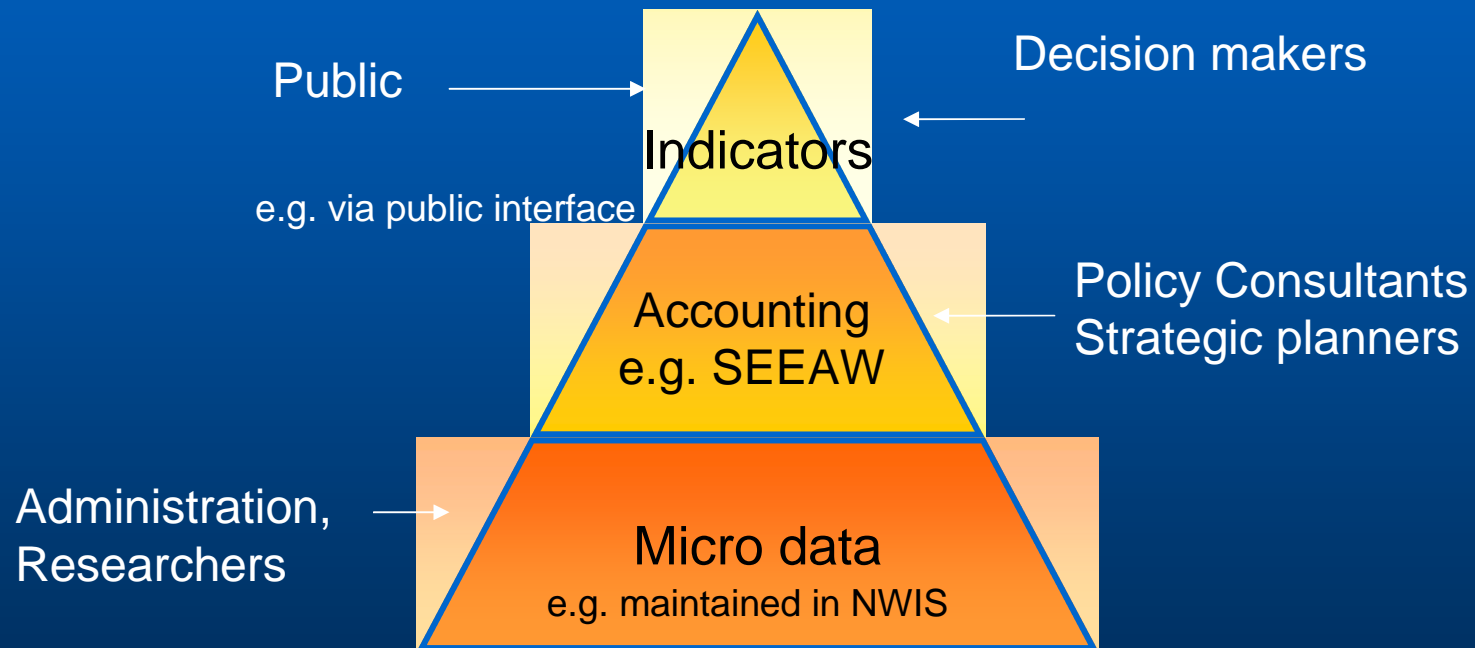

NWIS vision

- **Governmental system**
 - Interministerial intranet
 - Limited public access to aggregated information
 - Sub-systems (thematic) managed by each partner
 - Node of a broader system
 - SEIS
 - eGov infrastructure

- **Technical issues**
 - Web based system integrating thematic sub-systems
 - Graphical user interface, geographical data access
 - Using international data standards

Data aggregation vs user groups

NWIS governance

Policy Framework
Agreement
(main objectives,
priorities)

Common language
Specifications
Technical agreements

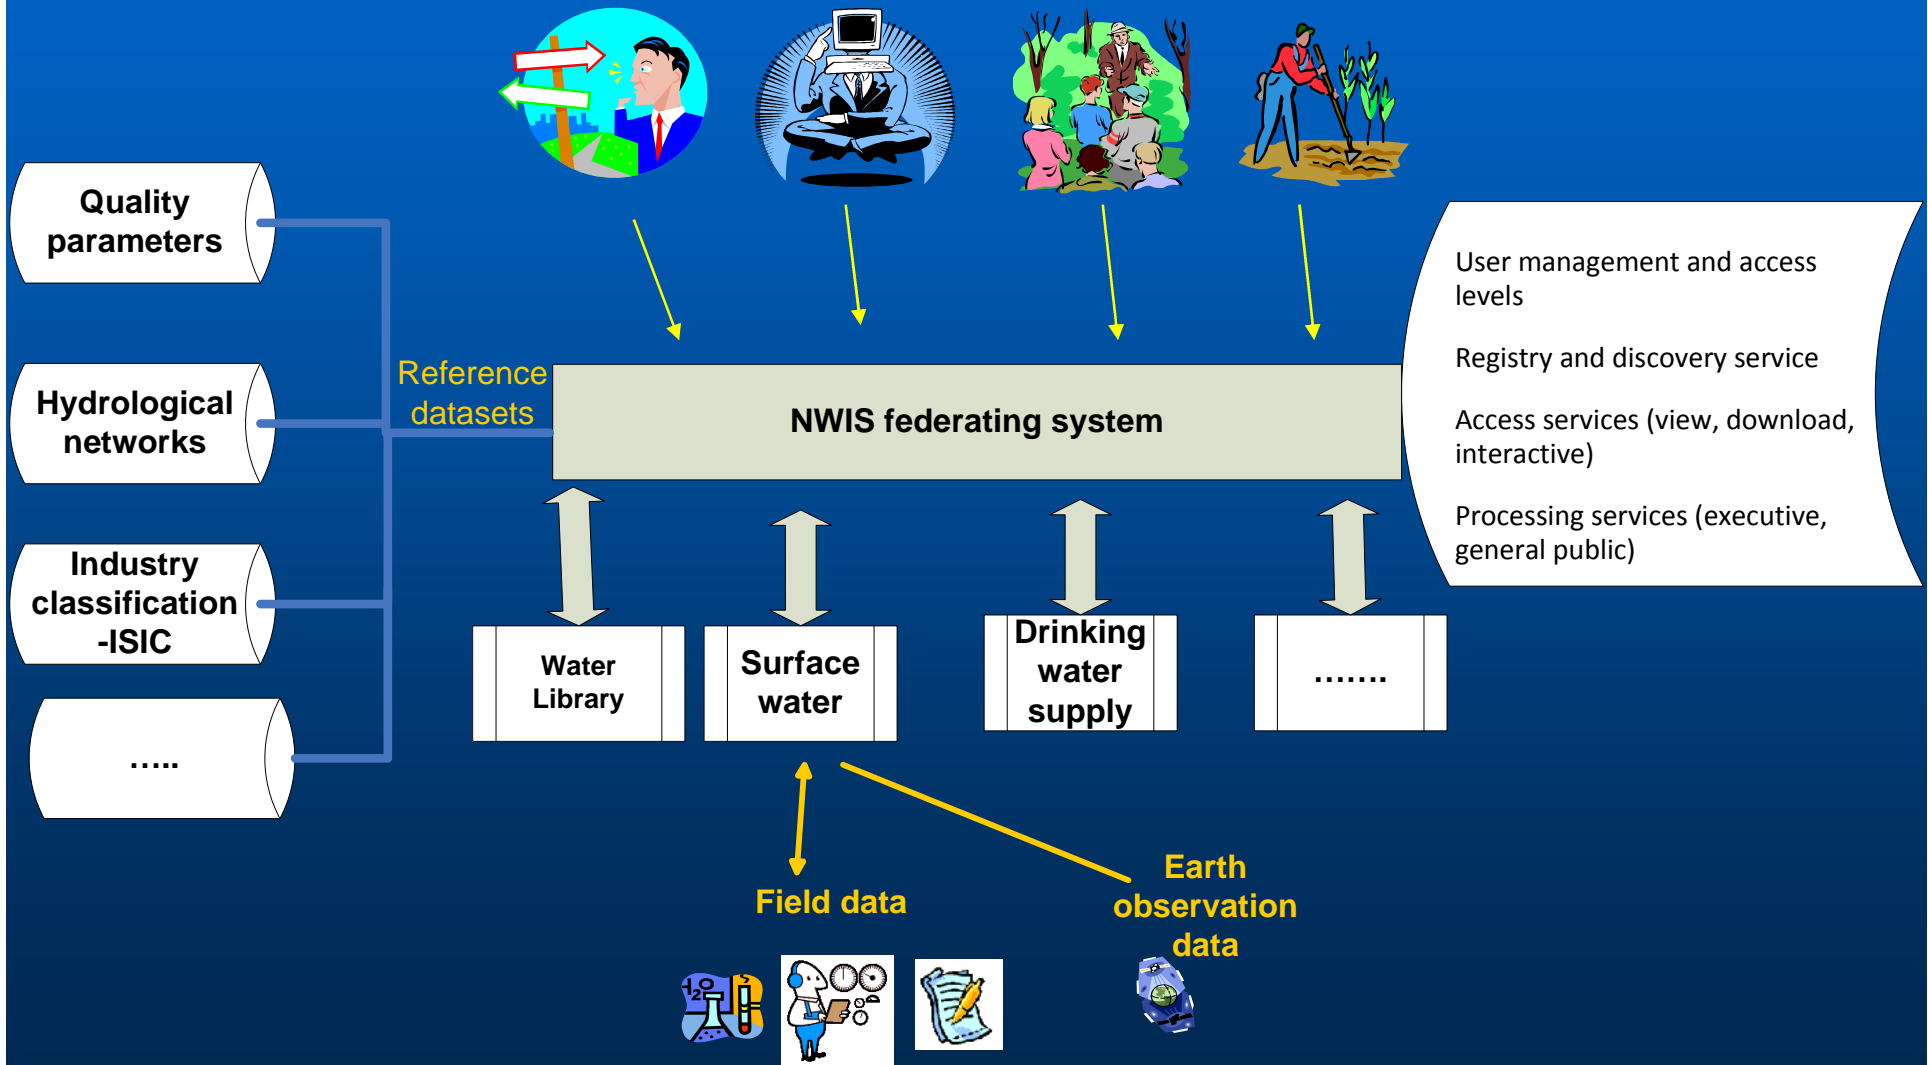

- **Interministerial body:**
 - ❑ Rely on an existing body
 - ❑ MoU on management / data sharing rules
 - ❑ Specific agreements on datasets to be shared, incl. publications
 - ❑ Defining priorities and further developments
 - ❑ System validation
 - ❑ Fund raising requests
 - ❑ Members: public institutions partners of the NWIS

- **Technical coordination committee**
 - ❑ In charge of implementation and system management
 - ❑ Definition of thematic developments and reference data sets
 - ❑ Involving focal points from each stakeholder

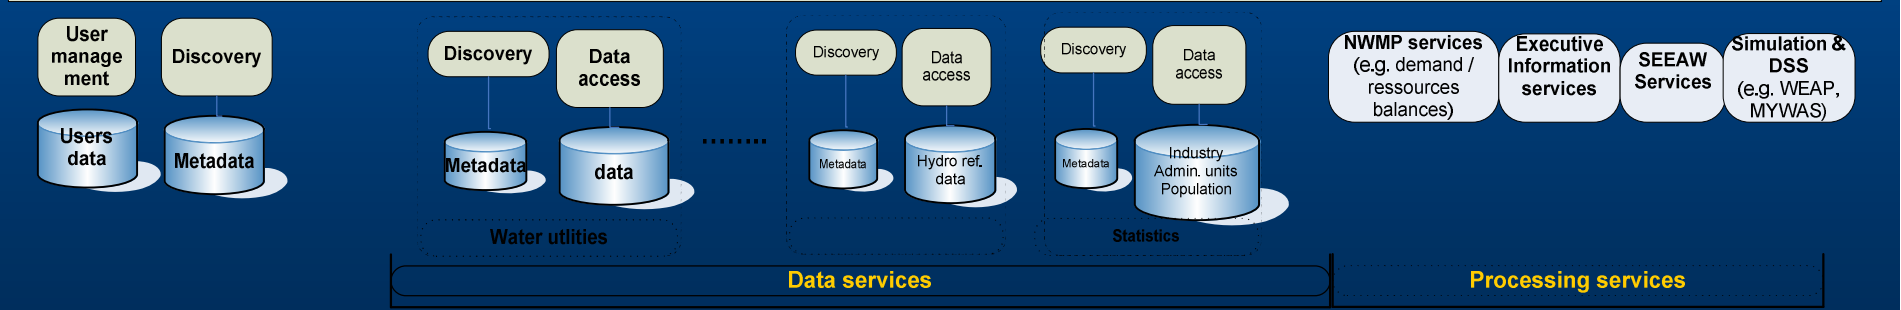

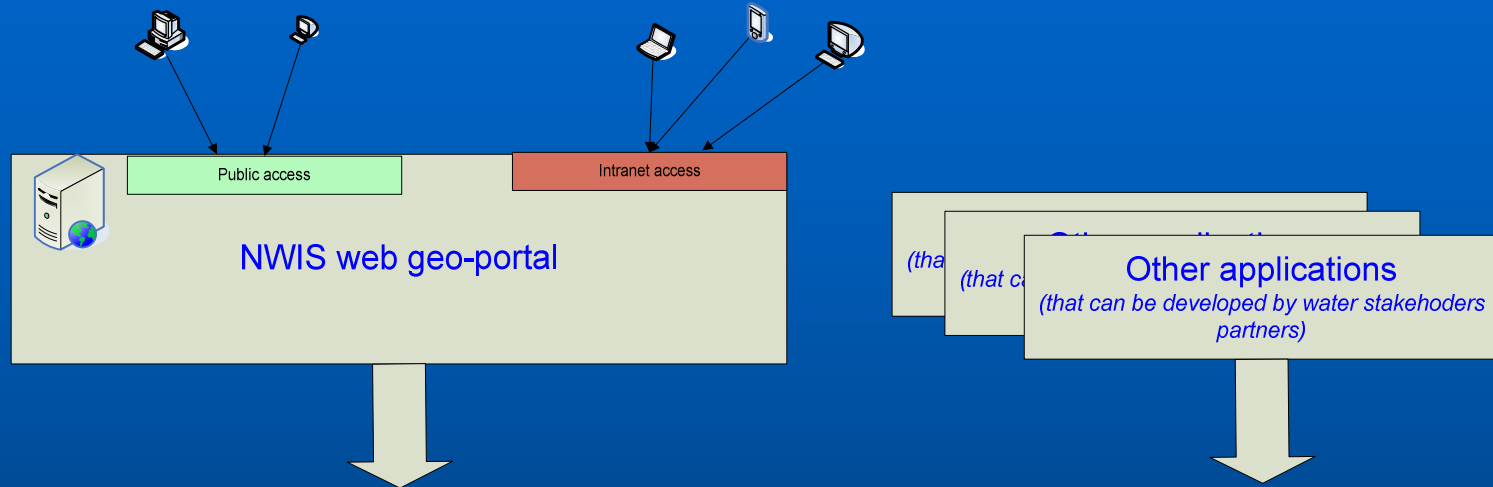

NWIS components

extendable architecture

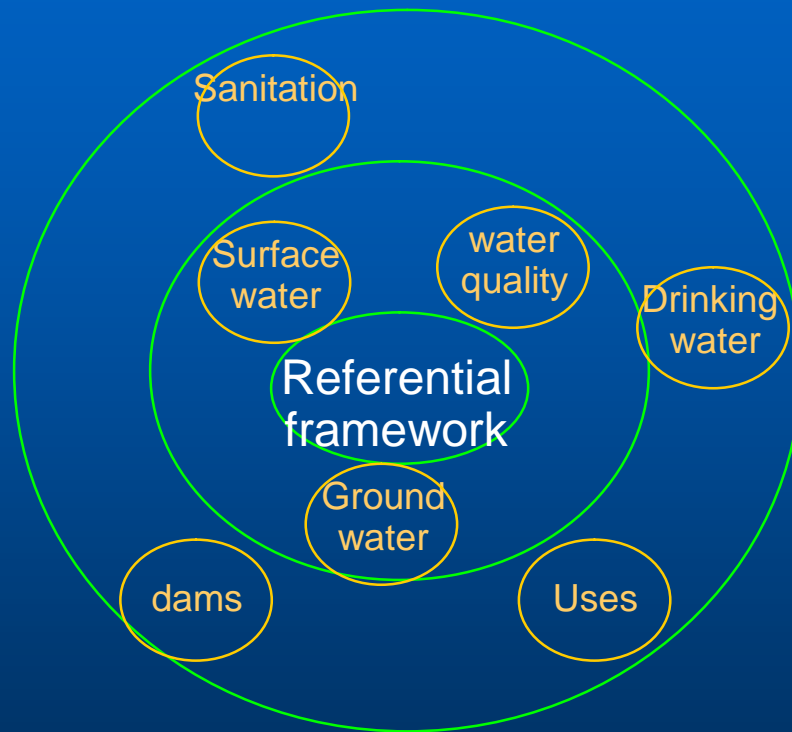

Technical architecture

A step wise integration process

- **Referential framework**
 - ❑ Set by and for the stakeholders
 - ❑ Quality Assurance
- **Sub-systems**
 - ❑ One domain = one leader
- **National system**
 - ❑ Sub-systems integration
 - ❑ Needs going beyond single sub-systems

Typical NWIS roadmap

- High level decision on building a NWIS
- MoU signature, with identification of focal points in each institution
- Fund raising
- Detailed analysis and NWIS specifications, including some sub-systems upgrading
- System implementation and training
- System operation
- Iterative process:
 - New components/public institutions can join later

2
years

Broader vision

- ***NWIS: a key component of an eGovernment infrastructure***
- ***An important node of a Shared Environmental Information System –SEIS–***
- ***Could benefit from EU experience on SEIS and its foreseen extension to Southern Med countries***

*Available from Medwis portal (under development)
WISE « look & feel »*

- **Generic conceptual data model**
- **Geo-catalogue of data sources and data services (discovery service)**
 - Metadata profile compliant ISO, INSPIRE and WISE
- **Web map viewer**
 - Linked to the geo-catalog
- **Interoperability technical guidelines**
- **NWIS feasibility studies and Med water observation study**
- **Examples of MoU for NWIS**
- **Reporting obligations of Med countries**

The screenshot shows the homepage of the Mediterranean Water Data portal. At the top, there is a navigation bar with links for 'home | login', 'WISE | EMWIS portal | Sitemap | Search'. The main content area features a large header image with a globe and water, and a section titled 'Mediterranean Water Data' with a sub-header 'or more commonly known as Med-WIS - is your gateway to existing information on inland water issues in the Mediterranean area. It also provides guidance and tools on data management for non EU countries. For European countries, data is provided by WISE.' Below this is a 'National level' button and a 'Regional level' button. A 'Latest news from EMWIS' section lists three items: 'The European Environmental Bureau (EEB) is looking for a Secretary General', 'Water shortage forces Syria villagers into cities', and 'IDE desalination seminar trains Jordanians and Palestinians'. The footer contains logos for SEMIDE EMWIS, WISE, and the European Commission.
